

Beyond organelles: towards integrative biomedicine

19th & 22nd
February
2021

19th of February (CET)

15:30. Presentation of the workshop

15:45. **Dr. Leonor Miller-Fleming**

*Mitochondrial Biology Unit-MRC
(Cambridge, UK)*

**"Membraneless organelles: from cell
physiology to pathology"**

16: 15. **Prof. Heidi McBride**

McGill University (Montreal, Canada)

**"Dissecting the mechanism and function of
mitochondrial-derived vesicles formation"**

17:00. **Dr. Viktor Korolchuck**

Newcastle University (Newcastle, UK)

"Metabolic functions of autophagy"

17.45. Closing remarks and chat

22nd of February (CET)

16:15 Presentation of the workshop

16:30. **Dr. Edna Cukierman**

Fox Chase Cancer Center (Philadelphia, USA)

**"Hindering pancreatic cancer could be attained by
targeting the dynamic reciprocity between cancer-
associated fibroblasts and their cell-derived extracellular
matrix"**

17:15. **Dr. Jose Javier Bravo-Cordero**

Icahn School of Medicine (NYC, USA)

**"High-resolution intravital microscopy reveals the plastic
behavior of metastatic cancer cells"**

18:00. **Prof. Denis Wirtz**

Johns Hopkins University (Baltimore, USA)

"Targeting metastasis by blocking cancer cell migration"

18.45. Closing remarks and chat

Registration required:
